

107F

- Body construction 107F Wafer 2"-8"
- Face to face ISO 5752 (series 20)/ API 609/ BS 5155
BS EN593/ EN-558-1/(series 20)
- Flanges ISO 7005-2 PN 10/16 (EN 1092-2 PN 10/16)
ANSI B16.1 class 125/ B16.1 class 150
- Top flange EN ISO 5211
- Max working pressure 175 PSI
- Temperature range -20°C + 140°C
- Operation Gear box with limit switch
- Coating Rilsan min 150 micron UV resistance
- Disc Ductile Iron Rilsan coated
- Tightness test According to EN 12266-1:2003
- Material certificate EN 10204.3.1

Materials

Item	Description	Material
1	Body (vulcanized)	Ductile Iron+ EPDM
2	Disc	Ductile Iron Rilsan coated
3,4	Shaft/ Axle	SS420
5,6	Bush	Brass/ Bronze
7	Washer	Galvanized Steel
8	O-Rings	NBR/ EPDM
9	Sealing Ring	Fiber
10	Circlip	Steel spring
11	Woodruff Key/ Rectangular Key	Steel
12,13	Bush	Brass/ Bronze/ Reinforced Nylon
14	Reduction Gear	Gear Box- Ductile Iron
15	Fastners	Galvanized Steel
